SiteSeer3D™ Receives EcoBroker® Certified Designation

First Technology for Real Estate Agents to Receive Green Designation

Sandpoint, ID – November 7, 2008 - GeoData Technologies, the leading provider of 3D collaborative software for the real estate industry, announced today that SiteSeer3D has become the first technology for agent and brokerages to receive the EcoBroker Certified “Green” designation. EcoBroker is the first and largest green designation program for real estate professionals.

“SiteSeer3D allows real estate professionals to significantly lower their gasoline consumption by touring properties virtually before visiting them, and by helping them coordinate better trip planning when they do decide to visit a property, stated Ryan Moehring, Senior Project Manager at EcoBroker. “SiteSeer3D also provides agents and buyers with valuable information that enable them to observe certain features of properties and their surrounding areas that can impact the energy efficiency of a home and the health and safety of its occupants.”

“GeoData Technologies shares EcoBroker’s commitment toward using technology to preserve natural resources and improve quality of life. Receiving the EcoBroker “Green” designation is significant to our customers because now agents and brokerages can demonstrate their commitment to our environment and their clients health through the use of technology that also improves their productivity and sales,” said Mark Williams, President of GeoData Technologies.

About SiteSeer3D™

SiteSeer3D is the premier 3D collaborative software for the real estate professionals. It allows real estate agents and their clients to tour real estate properties virtually. SiteSeer3D provides a true sense of property and the surrounding neighborhood by displaying specific information about a location and its surroundings including parcel size, schools and parks, nearby amenities, topography, traffic analysis and more. SiteSeer3D is an easy-to-use, high tech solution that uniquely promotes collaboration and raises the personal interaction between agent and buyer. By providing a comprehensive and integrated source for information and robust visualization of potential properties, SiteSeer3D increases productivity and reduces car expenses and unnecessary travel time.
