GeoData Technologies Signs Contract with Tomlinson Real Estate Group

Tomlinson Real Estate Group Selects SiteSeer3D™ to Expand Property Search Services

Sandpoint, ID – November 7, 2008 - GeoData Technologies, the leading provider of 3D collaborative software for the real estate industry, announced today that Tomlinson Real Estate Group (Tomlinson) has chosen SiteSeer3D to allow their agents and clients to evaluate properties and neighborhoods in 3D.

“Tomlinson is always looking to improve our technology base while providing enhancements and services to our agents. SiteSeer3D builds upon the contextual mapping that Tomlinson has done for years and provides a 3D interface for our agents and customers to see the property from many different angles. SiteSeer3D will help us to better serve our customers, agents and our brands,” said Fred Meyer, President of Tomlinson.

“Tomlinson is well known for providing the highest levels of service to their customers and agents. Their selection of SiteSeer3D raises the bar for customer service for all brokerages. SiteSeer3D™ will also reinforce Tomlinson’s brand through their use of state-of-the-art technology and on their custom virtual landscape”, stated Mark Williams, President of GeoData Technologies.

About SiteSeer3D™

SiteSeer3D allows real estate agents and their clients to tour real estate properties virtually. SiteSeer3D provides a true sense of property and the surrounding neighborhood by displaying specific information about a location and its surroundings including parcel size, schools and parks, nearby amenities, topography, traffic analysis and more. SiteSeer3D is an easy-to-use high tech solution that uniquely promotes collaboration and raises the personal interaction between agent and buyer. By providing a comprehensive and integrated source for information and robust visualization of potential properties, SiteSeer3D increases productivity and reduces car expenses and unnecessary travel time.
